

AQEEB RIZWAN

Mobile Software Engineer | React Native | Real-Time & AI-Native Experiences

[Email](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Mobile engineer with 4+ years of React Native experience across fintech, ed-tech, and travel-tech, specializing in real-time communication (WebSockets, Redis), offline-first storage (SQLite), and AI-native chat experiences with streaming responses.

EDUCATION

Newcastle University — MSc Computer Game Engineering

United Kingdom

Sept 2024 – Aug 2025

Gandhi Institute For Education & Technology — B.Tech in Computer Science

India

Aug 2012 – Jun 2016

SKILLS

Mobile: React Native, Expo, TypeScript, Android, iOS

State Management: Redux, Zustand, Context API

Fullstack: React, Node.js, FastAPI, Firebase, Google Cloud Functions, REST APIs, WebSockets

Data & Storage: SQLite, NoSQL, SQL, Redis

Cloud & DevOps: Google Cloud Platform, AWS, CI/CD, Expo EAS, Git, GitHub Actions

Tools: Cursor, Claude Code, Gemini, Codex

PROJECTS

Leaf & Spine — Cross-Platform PDF & EPUB Reader (Google Play & Apple App Store) — React Native • Expo • Firebase •

Google Cloud Functions • SQLite

Personal Project

Oct 2025 – Present

- Architected and developed a production mobile application using React Native and Expo, supporting both iOS and Android deployments.
- Designed a modular library system allowing users to import, organize, and read PDF, EPUB, CBZ/CBR and audio documents within customizable 3D bookshelf and ambient environments.
- Implemented offline-first local storage using SQLite, enabling full library access and reading without network connectivity.
- Built a dynamic in-app content store and persistent customization system for unlockable bookshelves, book covers, and animated ambient environments.
- Implemented secure server-side in-app purchase validation via Google Cloud Functions, paired with Firebase Anonymous Authentication for account-less usage and cross-device entitlement tracking.
- Implemented cross-platform push notifications using Firebase Cloud Messaging (FCM) and Apple Push Notification service (APNs).
- Optimized document rendering and navigation for smooth reading performance and responsive library browsing.
- Deployed and maintained the application on Google Play and Apple App Store.

EXPERIENCE

Software Developer (Remote) — React Native

NxVoy Trips — London, UK

Feb 2025 – May 2025

- Built an AI chat feature in React Native with real-time streaming of AI responses into the user's chat interface, delivering a responsive, AI-native conversational experience.
- Implemented WebSocket communication for real-time data validation and responsive client updates.
- Developed backend APIs using FastAPI integrating Apple and Google authentication.
- Built mobile application features from design specifications, focusing on performance, usability, and cross-platform consistency.

Software Developer — React Native

Banca Sella — Chennai, India

May 2019 – Apr 2021

- Contributed to development of a cross-platform React Native banking application supporting Android and iOS.
- Implemented secure mobile features aligned with financial compliance and security standards.
- Built an internal automation tool to streamline mobile build generation and deployment workflows.

Software Developer

Ahaguru — Chennai, India

Oct 2017 – Apr 2019

- Designed and deployed a real-time chat system using WebSockets, with Redis-based message synchronization across distributed servers, enabling low-latency communication between teachers and students during live sessions.
- Developed a video conferencing web platform and a React Native Android application for attendance and test tracking.
- Built a React Native Android test-taking application with login, timers, attendance tracking, and real-time result updates.

Software Developer

Bookingjini — Bhubaneswar, India

Mar 2017 – Jun 2017

- Developed a single-page web application simplifying hotel booking workflows and UI interactions.
